INTRODUCTION

Energetic and innovative computer engineer with a passion for technology and a proven track record of successfully delivering multiple projects. Skilled in a variety of programming languages and technologies, I thrive in dynamic environments where I can apply my knowledge and creativity to solve complex problems. My hands-on experience, coupled with a strong foundation in computer engineering concepts, enables me to develop cutting-edge solutions that drive innovation and exceed expectations.

EDUCATION

Vishwakarma university, Kondhwa— Btech

2023 - 2026

Pursuing the BTech degree in Computer Engineering in

Vishwakarma university

Government Polytechnic, Malvan— Diploma

2021 - 2023

Completed diploma in computer engineering in

Government Polytechnic Malvan

J.G.E.M.S, Malvan— SSC

2007 - 2020

PROJECTS

Student LC Generator System

This system won the first prize in the National Level Research Exhibition cum Competition held at MITM Institute. The Student LC (Leave Certificate) Generator System is a software application designed to automate the process of generating leave certificates for students. It streamlines the traditionally manual and time-consuming process, allowing educational institutions to efficiently manage and issue leave certificates to students.

MFA for Banking Systems

Built Multi-factor authentication system for banking websites

SKILLS

Programming Skills

Problem Solving Skills

Technical and communication skills

Teamwork

Database Management Skills

AWARDS

1st prize in VISIONARY HACKATHON 2023

1st prize in REX, National level research exhibition cum competition 2023

2nd prize in METROPULSE, National level technical event 'code war' 2023

3rd prize in VISIONARY TECHFEST 2024

LANGUAGES

Python
